Company Secretarial Practice (3rd ed.)

by Karen Baldwin FCG

Company Secretarial Practice is an authoritative guide on the role of the company secretary who needs to ensure that the company operates according to good governance principles. The third edition examines this role in detail in accordance with the Companies Act, 2008, the Johannesburg Stock Exchange Listings Requirements and the King V™ Code of Corporate Governance. It covers the role of the company secretary in relation to the governing body, shareholders, stakeholders and executives. It conceptualises the nature and principles of regulatory requirements for a company and provides practical examples of compliance requirements, such as maintenance of records and minutes.

It addresses the regulation and disclosure requirements for a company, with specific reference to meetings of shareholders and members, the law and practice of meetings, and how to deal with shares. Finally, the role of external auditors and their relationship with the company is addressed with specific reference to the reporting requirements expected of a company. **Company Secretarial Practice** is an essential guide for anybody who is a company secretary or studying towards becoming one.

Applied Governance (2nd ed.)

by Karen Robinson LLB, LLM, FCG

Today more than ever, good corporate governance is essential in a world experiencing financial crises, state capture, corruption and mismanagement on an unprecedented scale in both the private and public sectors. We have also seen a proliferation of governance codes across the globe which set out what should be done, but not necessarily how it should be done. Hence, the title of this book – **Applied Governance**.

The book explores the general principles of corporate governance, in-depth discussions, recent case law and practical examples.

The book covers areas such as the role of the governing body; risk governance and internal control; IT governance; relations with shareholders and stakeholders; corporate social responsibility and sustainability; remuneration of directors, and governance of public, unlisted, family-controlled, state-owned and non-profit companies. The book ends with an overview of international corporate governance trends.

It integrates the requirements of the King V™ Code of Corporate Governance, the 2008 Companies Act and the JSE Listings Requirements in an easy-to-read style, and provides the reader with challenging questions requiring application of the principles to typical governance problems – the essence of what a governance professional should be able to do.

R860 per book *(Excludes delivery charges)*
